## **smplsolutions Provides Responsible Technology Recycling Service is Free of Charge for Clients**

**Lake Forest, CA** – (April 22, 2013) – **smplsolutions**, your trusted partner in business communications technology, is providing a responsible technology-related recycling service at the company's Lake Forest, California office.

“Technology devices contain significant quantities of hazardous materials known to cause serious health issues including death, birth defects, blindness and organ failure,” says **smplsolutions** President & CEO David Case. “It’s our responsibility to educate clients and help them safely dispose of their technology-related waste.”

**smplsolutions** collects batteries, computers, monitors, servers, printers and other technological devices. After the hard drives are destroyed to ensure client privacy, the hardware is piled on a pallet in the warehouse for a hardware recycling company to pick up. The last pickup included more than 3,000 lbs. of batteries.

“We have a very environmentally conscious staff,” says **smplsolutions** Marketing Manager Gianna Santi. “In addition to our office dog, many team members have family pets at home, and employees enjoy various outdoor activities like sailing, hiking, dirt biking and skiing. Preserving our planet for future generations is very important to each of us as individuals and has become part of our corporate culture.”

The responsible technology-related recycling program is free to **smplsolutions** clients, and technicians will pick up recyclables when they are on location during service calls. Clients can also drop items off at the company's office. For additional ideas that can help reduce your company's carbon footprint, check out **smplsolutions'** blog post [“5 Ways Your Company Can Get Green.”](#)
